

Boundary Potable Water Chlorination System

- Top up Chlorine levels for disinfection of incoming water
- Control via ORP, compensated for flow rate
- Fail-safe features to prevent over/under dosing of Chlorine
- Web connectivity for remote monitoring and alarm response
- Water meter compensates for flow and stops dosing on no flow
- Sample points inlet, middle and outlet to verify Chlorine level

- Purpose built neutral colour weather-proof lockable ventilated cabinet
- Can be mounted on a plinth on the ground external to the building
- Plumbed in-line with incoming water (full bypass recommended to enable maintenance).
- Standard Pipe sizes available: 25mm, 50mm, 65mm, 80mm, 100mm
