

Cooling Tower Control & Dosing Brominator & Pump Skids

Description

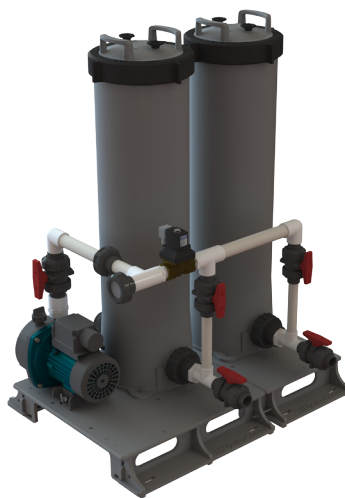

Assembled or Flat-packed Skid including Onga recirculation pump, 26kg Brominator with reliable solenoid valve, manifold, fittings and inline strainer supplied loose to fit onto inlet of Onga pump, or pre-fitted post Onga pump delivery port.

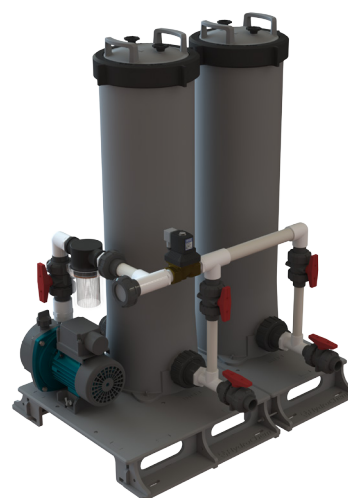

HC-SKID-BROM26-413-A

HC-SKID-BROM26-413-B

HC-SKID-BROM26-415-A with
HC-SKID-415-EXTRABROM26

HC-SKID-BROM26-415-B with
HC-SKID-415-EXTRABROM26

Features & Benefits

- Strainer can be fitted prior or post Onga 413 or 417 pump, and can be converted on site from one to the other (Onga 415 skids cannot be converted on-site)
- Supplied with tools to remove lid, lid lock-ring, strainer bowl and air release valves with ease
- Filter disc machined in port/s does not allow whole tablets to exit brominator
- Can be shipped flat packed to reduce freight cost
- Onga pump can be removed by hand (by removing wingnuts) - no tools required
- Multiple barrel unions for ease of maintenance
- Viton seals resistant to Bromine water
- Canister one piece moulded body - will not split
- Open channel under base designed to fit Colorbond roofing
- Hydrochem logo engraved in base

How to Order
