

EMEC Pump Maintenance Kits

v1.1

Ideal Pump Repair & Preventative Maintenance Solution

CWC is pleased to announce the release of EMEC Maintenance Kits for the entire range of EMEC dosing pumps carried by CWC.

Each EMEC Maintenance Kit consists of the following components

- Suction & Discharge valves.
- De-gassing valve (model dependent).
- Non-return valve for foot filter.
- Injection valve.
- O-ring for pump head.
- Replacement bolts and washers.

Simplified Pump Maintenance

Choosing the correct parts to perform maintenance on your EMEC pump is now even easier.

All parts supplied in an EMEC Maintenance Kit are shrink wrapped onto a schematic drawing of the relevant pump head. Simply install each part in the location shown.

Easy Selection

Every EMEC pump sold by CWC has a matching Maintenance Kit kept in stock.

To select the correct EMEC Maintenance Kit simply contact CWC or refer to the CWC Web Site.
