

## Accessories & Other Equipment

### Submersible Probe Holders

Product Code	Description
PRH-SM1-XXX	Submersible PVC holder for conductivity, pH or ORP probes with 3/4" threaded back ends. Includes 2 pipe clips for mounting to inside wall of tank and PP Tee for protecting probe front end. (Specify length when ordering by replacing "XXX" with the desired length in cm)
PRH-SM2-XXX	Submersible PVC holder for conductivity, pH or ORP probes with 3/4" threaded back ends. Includes M40 compression gland fitted for mounting through top of tank and PP Tee for protecting probe front end. (Specify length when ordering by replacing "XXX" with the desired length in cm)
WA L-3042	Bi-Mount probe holder for 12mm smooth body WA GTDJ electrodes with bell shaped top. 3/4" BSPP process connection (probe protrudes 36mm from end of thread). Also suitable for submersible mounting. (Not suitable for GTDJ Probes with TOP 68 Connector)
EMEC PEC	Submersible PVC holder for the EMEC range of pH/ORP electrodes, diameter 12mm. Length = 100cm
EMEC PEC/SN6	Submersible PVC holder for pH or ORP electrodes with PG13.5 thread. Length = 100cm
EMEC PEC-E	Submersible PP holder for the EMEC ETORBH Turbidity or EOLUM DO probes, 50 degC max, Length = 100cm
EMEC PECAP/SN6	Self-cleaning submersible PVC holder for pH or ORP electrodes with PG13.5 thread. Length = 100cm
