PUMP MANUFACTURERS

SINCE 1975

ARGAL boasts +45 years of activity in the invention and production of pumps made of thermoplastic material, compounds and corrosion-resistant metal alloys. During the past decade, significant efforts were directed to research and development on the entire production. Such an effort resulted in entirely new or renovated pump ranges.

Our mission is a continuous and constant technological improvement, along the path of innovation instead of emulation.

How? By offering the best technical performance and engineering obtaining the leadership in performance while providing appropriate responses to the needs of market dynamics by realizing a “State-of-the-art quality.

Today the company has an extensive range of pumps in various constructions for industrial applications requiring temperatures ranging from -40°C to $+120^{\circ}\text{C}$, with load capacities up to $1700\text{ m}^3/\text{h}$ -head over the 100 m.

ARGAL is certified ISO 9001:2015

OVERVIEW

MATERIALS

- PP +G** Glass fiber reinforced Polypropylene
- PP +C** Carbon fiber filled Polypropylene
- PVDF +C** Carbon reinforced Polyvinylidene Fluoride
- POMc +G** Glass fiber Polyacetal Copolymer
- PE 1000** Ultra-High Molecular Weight Polyethylene
- PTFE** Poly Tetra Fluoro Ethylene

- Alu** Aluminum
- AISI 316 L** Stainless Steel (low carbon)
- FRP** Fiberglass reinforced Polymer resin

CONFORMITY

Upon request, **ARGALAIR AODD** pumps can be set with conductive materials and be compliant with

- **ATEX Zone 1 (II 2G Ex h IIB T4 Gb X | II 2D Ex h IIIB T135°C Db X)**

Made for food applications and related operations: the wetted parts are made of **electropolished AISI 316L with 125 Ra surface finishing** - recommended material for Food&Beverages processing.

ARGAL delivers the declaration that the materials of construction are compliant with FDA conformity.

- **Great choice of high-quality materials**
- **Continuous, discontinuous and mobile operation**
- **Dry-running**
- **Self-priming**
- **Dead-head**
- **Low air consumption**
- **Ideal with shear-sensitive and/or viscous liquids**
- **Easy installation and maintenance**
- **Variable flow and discharge pressure**
- **Unique internal design and components**

ASTRAevo

- 10 models available from ¼" to 2"
- Materials: PP+g · PP+c · PVDF+c · POMc · ALU · AISI 316I
- Max capacity: 715 l/min
- Integrated muffler up to 1"
- Upon request: ATEX Zone 1 compliance

Main sectors
Chemical processes
Industrial processes
Laboratories
Flexography
OEM market

They are ideal for transferring, dosing, injecting corrosive, aggressive and viscous liquids with high performance and reduced air consumption.

ASTRAevoFOOD

- 6 models available from ½" to 2"
- Material: electropolished AISI 316I
- Max capacity: 715 l/min
- Shear-sensitive liquids

Main sectors
Food&Beverages
Pharmaceutical processes
Laboratories
Cosmetics
Shear-sensitive processes

The series is conceived for the Food & Beverages industry and related ones. All materials in contact with the liquid are FDA compliant.

QUANTUM

- 3 models available from ½" to 1 ½"
- Materials: PTFE · PE1000
- Max capacity: 450 l/min
- Ideal for ultra-pure liquid transfer

Main sectors
Pharmaceutical processes
Photovoltaic
Laboratories
Metal treatments
OEM market

Cubic-shape pump from machined PTFE or pure PE which offers an unlimited chemical resistance, and allow the pumping of viscous liquids.

ASTRA SOLID FDA

- 4 models available from ½” to 2”
- Materials: PE1000
- Max capacity: 715 l/min
- Integrated muffler up to 1”

Main sectors
Metal & mineral treatments
Wastewater treatments
Seawater applications
Heavy-duty processes
Abrasive processes

The pump is entirely made from machined **Ultra High Molecular Weight Polyethylene**. It offers excellent mechanical properties, high-abrasion and stress resistance.

MISTRAL

- 3 models available with size 3” and 4”
- Material: PE1000 (3”) · AISI 316I (3” - 4”)
- Max capacity: 1280 l/min
- Easy access valve
- Solid handling up to 13 mm
- Corrosion and abrasive-resistant materials

Main sectors
Offshore platforms
Cement mixing
Metal & mineral extraction
Heavy-duty processes
Chemical processes

It represents the safest and most efficient pneumatic solution for heavy-industrial, dangerous and/or continuous operations.

ARGALAIR's UNIQUE ADS* made of only 5 components

*Air Distribution System

ASTRAevo

The series distinguishes itself from competitors' AODD pumps thanks to the choice of materials: from thermoplastic polymers reinforced with glass or carbon fiber to the new distribution system, high-quality material for diaphragms, and optimized design.

They are ideal for transferring, dosing, injecting corrosive, shear-sensitive and viscous liquids with high performance and reduced air consumption.

- Dry-running
- Self-priming
- Non-icing air valve system
- Ideal with shear sensitive liquids
- Easy installation and maintenance
- Integrated muffler up to 1"

- Unique internal design and components
- High-quality materials for diaphragms
- Best-in-class air consumption
- Upon request: ATEX Zone 1 compliance* with special conductive material for body and parts

* Zone 1 (II 2G Ex h IIB T4 Gb X | II 2D Ex h IIIB T135°C Db X)

CONNECTIONS

▶ Standard configuration with threaded connections BSP "L-L" for all plastic and aluminum pumps and for AISI 316L versions up to model DDE 160 (1)

▶ Other connections are available upon request (2)

! Models DDE 400 and DDE 650 made of AISI 316 L are set with "F-B" connections.

! Model DDE 020 cannot be set with F or B connections

! Model DDE 020 set with V connection is not recommended

For any questions on connection configuration, contact our sales force.

STANDARD⁽¹⁾

UPON REQUEST⁽²⁾

APPLICATIONS

ASTRAevo pumps (1 1/2" PP+glass version) installed for wastewater treatments (Belgium).

ASTRAevo pumps (1/2" PP+glass version) installed for chemical transfer (Europe).

ASTRAevo pumps (1 1/2" metallic version) installed for lubricant transfer (China).

- **Chemical processes**
acids, concentrated liquids, acid mix, liquids with solids
- **Industrial processes**
residual waste, cleaning solutions
- **Laboratories**
cleaning solutions, mix of acids
- **Flexography**
inks, paintings and glues
- **Seawater applications**
seawater, brine, coolants

MATERIALS

ASTRA SOLID

ASTRAsolid range is **made of solid-block PE1000 (Ultra High Molecular Weight Polyethylene)** and distinguishes itself from the competitors' AODD range.

PE1000 offers excellent mechanical properties and high abrasion and stress resistance.

Only available for minimum order quantity

- Made of solid-block
- 5-component air distributor system
- modified PTFE diaphragms inert to chemicals
- Auto-lubricating and anti-friction ADS*
- Easy installation and maintenance
- Internal or external installation
- Ideal for operations in cryogenic conditions (up to -40°C)
- For acids, alkalis and basic acids, shear-sensitive liquids

* Air Distribution System

MATERIALS

QUANTUM

QUANTUM series is made of pure polymers solid-block construction and with original internal design.

The idea was conceived to offer a **unique pump perfectly balanced between efficiency** (linear pumping directly to the center block and reduced air consumption) **and sustainability** (reduced use of materials, longer life cycles and all parts are recyclable).

PE
1000

PTFE

- Made of solid-block PTFE or PE1000
- Unique and super efficient internal design
- Non-icing valve system
- Unlimited chemical resistance
- Diaphragms are not coupled to the shaft
- Acids, mixtures, glues, additives, inks, adhesives, solvents...
- Auto-lubricating and anti-friction material
- Easy installation and maintenance

MATERIALS

Body materials	1	• PE1000 • PTFE
Diaphragms	2	• TPE*+PTFE • TPV**+PTFE
Valve balls	3	• PTFE • EPDM • NBR • VITON
Valve seats & cage	4	• PTFE • PE1000
O-ring	5	• PTFE • FFKM

* Santoprene®, Geolast® (ExxonMobil)

** Keyflex®, Hytrel® (LG Chem Ltd.)

	PTFE	PE1000
Pumped liquids	For ultra-pure liquids	All types, especially abrasive ones
Working temperature (max)	100°C	70°C

UNIQUE & INNOVATIVE

► Advantages of the free-fastened diaphragms

- easy maintenance and replacing
- more safety with aggressive liquids

► Advantages of the special design for the valves

- guaranteed easy maintenance operations
- no need to remove the pump from the system

► Advantages of the non-icing valve system

- utterly not affected by humidity

► Advantages of the air distributor system

- equipped with air capacity regulator
- quick discharging valve (30% less air consumption)
- operations in any conditions

► Advantages of the security system

- longer life cycle
- in case of diaphragm leakage, the liquid cannot enter the air supply line

APPLICATIONS

QUANTUM pump installed for HF transfer to reactors (Italy)

QUANTUM pumps for acid mix transfer (Belgium)

- **Solar panel systems**

ultra-pure liquids

- **Display production**

nematic, smectic liquid crystals

- **Chemical waste treatments**

HF from reactors

- **Pharmaceutics and Laboratories**

strong acids, viscous mix, cleaning solutions

Air connections	G 3/8" BSP
Max flow rate	160 l/m'
Max air pressure	8 bar
Displacement/cycle	440
Max size solids	11 mm

DIMENSIONS (mm)

PE1000 PTFE **A** 270 **B** 250 **C** 227

MATERIALS

DDQ 400 (1 1/2")

TECHNICAL DATA

Fluid connections	G 1 1/2" BSP
Air connections	G 1/2" BSP
Max flow rate	400 l/m'
Max air pressure	8 bar
Displacement/cycle	1,340
Max size solids	19 mm

DIMENSIONS (mm)

PE1000 PTFE	A 381 B 330 C 310
--------------------	--------------------------

MATERIALS

MISTRAL

MISTRAL series represents the safest and most efficient pneumatic solution for heavy-industrial, dangerous and/or continuous operations.

The range came out first with the metallic version, entirely made of stainless steel, to allow the pumping of highly corrosive agents. Then the solid-block plastic version was conceived to resolve the market issue of abrasion.

- High capacities for large loadings
- Extremely robust big-size AODD solutions
- 5-component air distributor system
- Non-icing valve system
- Corrosion and abrasive-resistant materials
- Auto-lubricating and anti-friction ADS*
- Easy installation and maintenance
- Ideal for solid handling (up to 13 mm)
- Internal or external installation
- Upon request: ATEX Zone 1**

* Air Distribution System

** Zone 1 (II 2G Ex h IIB T4 Gb X | II 2D Ex h III B T135°C Db X)

MATERIALS

Body materials	1	• AISI 316L • PE1000
Diaphragms	2	• EPDM • NBR • EPDM+PTFE • NBR+PTFE
Valve balls	3	• EPDM • NBR • PTFE • AISI 316L
Valve seats & cage	4	• POLYURETHANE • PE1000 • PVDF • AISI 316L
O-ring	5	• EPDM • NBR • FKM • PTFE

	AISI 316L	PE1000
Working temperature (max)	100°C	70°C

MADE FOR HEAVY-INDUSTRIAL OPERATION

MISTRAL solid pump 3" for ceramic production plant (Italy)

MISTRAL pump 4" for silice extraction (Italy)

MISTRAL pump 3" for brine circulation, offshore platform (Asia)

- **Offshore platforms**
waste, brine, mud, seawater
- **Chemical processes**
strong acids, concentrated acids, cleaning solutions
- **Construction processes**
cement mixing loading/unloading
- **Metal and mineral treatments**
liquid extraction, cleaning solution circulation
