Improve Bleed Valve Reliability

Belimo Bleed Valve Upgrade Option

CWC is pleased to announce the release of the Belimo Actuated Ball Valve as an option on all **DIGICHEM**[®] control systems.

The Belimo LRU230 & TRF230 Actuated Ball Valves are perfectly suited for applications where conventional solenoid valves are prone to fouling due to high levels of contamination in the sample water.

Indoor Applications

Belimo valves are available as a simple upgrade option. Standard solenoid valves can be replaced with a Belimo valve using the following part numbers:

Size	Part Number
1/2" (15mm)	AF02-1/2-LRU230
3/4" (20mm)	AF02-3/4-LRU230

DIGICHEM-AB2-VB-CABG

Outdoor Applications

Belimo valves have a maximum IP54 rating, as such, they require weather protection. As a result, CWC has created a new configuration of enclosed **DIGICHEM**[®] control system that utilises the Belimo Actuated Ball Valve.

The DIGICHEM-AB2-**VB**-CABG (on left) is a standard Dual Biocide & Inhibitor **DIGICHEM**[®] control system fitted with a Belimo Actuated Ball Valve.

Please refer to CWC for other configurations of popular systems.
