SITRANS F Flowmeters

Display protection lid for SITRANS F M MAG 5000/6000,
SITRANS F C MASS 6000 and SITRANS FUS080 transmitters

Siemens Flow Instruments introduces a display protection lid to the SITRANS F USM II transmitters. The new protection lid can be used for the IP67 Polyamide version (new and already installed) of SITRANS F M MAG 5000/6000, SITRANS F C MASS 6000 and SITRANS FUS080 transmitters and is offered as an accessory to all three technologies.

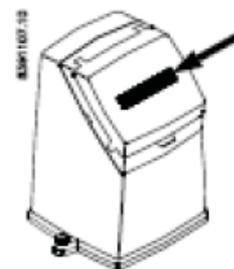

The new lid protects the LED display when installed in direct sunlight and from dust and dirt.

The protection lid is easily mounted just by replacing the existing display frame

1. Remove the frame

2. Snap on the new lid
