

## Cooling Water Treatment Controller Model: DIGICHEM<sup>®</sup> Plus<sup>+</sup> Gen II

**Scan QR code above for resources including  
complete instruction manual and installation diagrams**

***Supplied by:***

M1 ver 1.0

***Manufacturer:*** Convergent Water Controls Pty Ltd, Sydney Australia.

***Note:*** On-going product development at Convergent Water Controls may lead to changes in the specifications of this product.

***Warranty:*** This product is guaranteed for a period of 12 months from installation date or 18 months from Invoice date (whichever occurs first). The warranty applies to manufacturing or component defects which may cause the unit to malfunction under specified conditions. The guarantee does not cover damage due to abuse, tampering or improper installation.

***Disclaimer:*** Convergent Water Controls will not be held liable for any consequential damage or loss arising resulting from product malfunction.

# **1. Safety Warnings**

---

Only trained/qualified personnel may open and work inside of a DIGICHEM Plus+. When opening the controller enclosure please take care of the following:

- Electrical Hazard Warning – Physically disconnect the 240V AC power before opening.
- Static Discharge Warning – discharge any static built up by earthing, use care and common sense.
- Leaking and water ingress – when closing the enclosure, ensure the rubber seal is correctly seated to ensure it does not leak and the IP rating is maintained.

# **2. Mounting**

---

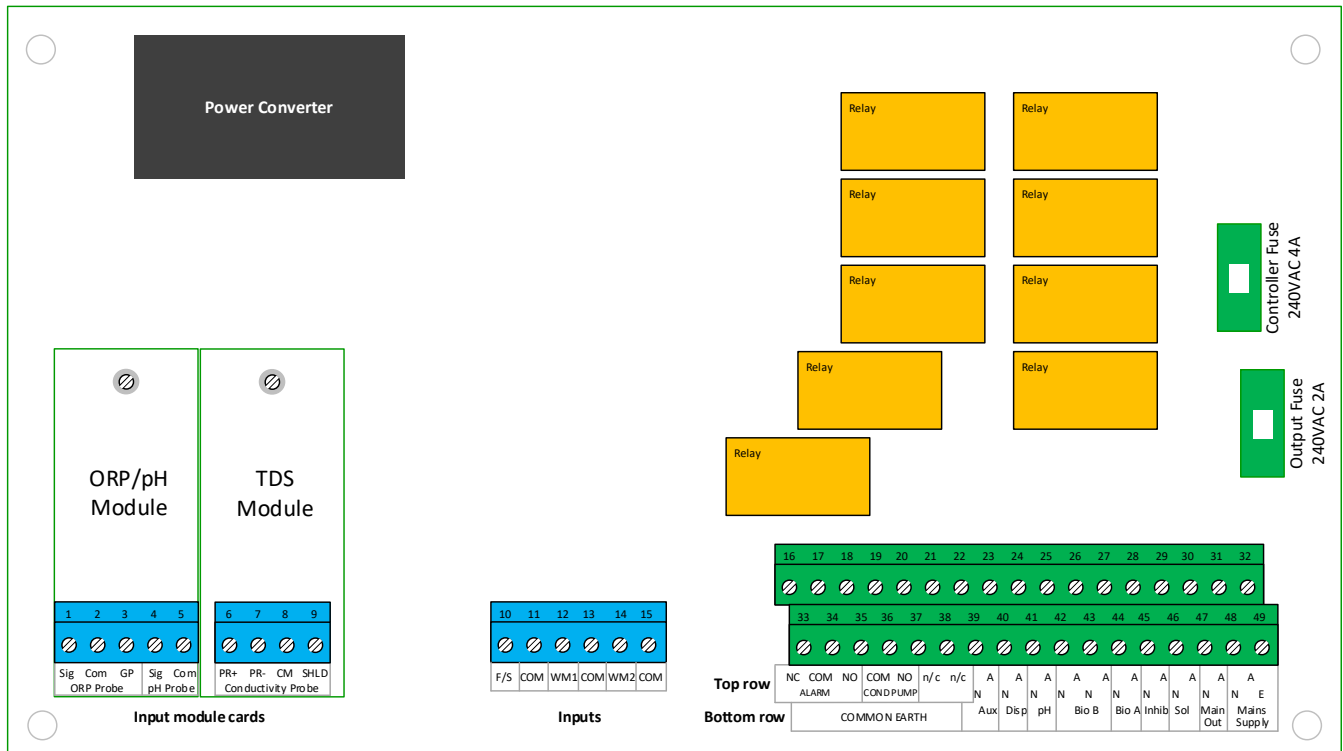

Most DIGICHEM Plus+ Gen II controllers are supplied pre-mounted on a back board or in a cabinet. The board layout can be found on the included Assembly Diagram.

Mount the back board or cabinet on a flat, vertical surface using suitable fasteners appropriate for the wall type (e.g., masonry anchors, timber screws). Mounting holes are pre-drilled. Ensure the board is installed:

1. Above flood level
2. In a well-ventilated area
3. Protected from direct sunlight, chemical spray, water or extreme heat

Specific system dimensions can be found in the DIGICHEM Plus+ datasheet on the website [www.cwc.com.au](http://www.cwc.com.au) and by following the QR Code link.

### 3. Wire Connections/Pinout

Pin	Description	Wire Colour
1	ORP Probe Signal	White
2	ORP Probe Common	Green
3	Ground Probe	Grey
4	pH Probe Signal	White
5	pH Probe Common	Green
6	Conductivity Probe PR+	Red
7	Conductivity Probe PR-	Yellow
8	Conductivity Probe CM+	Blue
9	Conductivity Probe Screen	Grey
10	Flow Switch	White
11	Flow Switch Common	Green
12	Water Meter 1 - Make Up	
13	Water Meter 1 - Make Up Common	
14	Water Meter 2 - Bleed	
15	Water Meter 2 - Bleed Common	
16	Alarm Relay - NC	
17	Alarm Relay - Common	
18	Alarm Relay - NO	
19	Cond (Condenser) Pump Common	
20	Cond (Condenser) Pump NO	
21	No connection	
22	No connection	
33	Common Earth	Yellow/Green
34	Common Earth	Yellow/Green
35	Common Earth	Yellow/Green

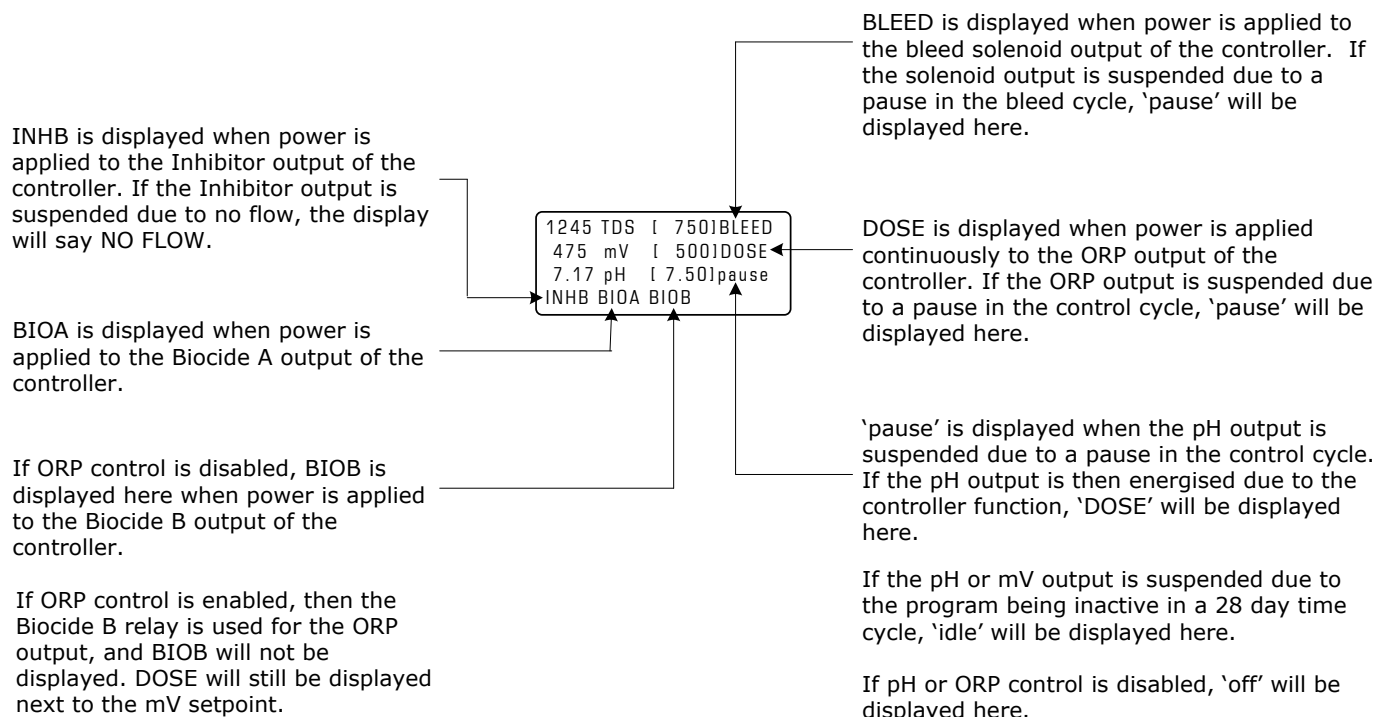

Pin	Description	Wire Colour
36	Common Earth	Yellow/Green
37	Common Earth	Yellow/Green
38	Common Earth	Yellow/Green
23	Auxiliary Active (240VAC)	Brown
39	Auxiliary Neutral	Blue
24	Dispersant Active (240VAC)	Brown
40	Dispersant Neutral	Blue
25	pH Active (240VAC)	Brown
41	pH Neutral	Blue
26	Bio B /ORP Active (240VAC)	Brown
42	Bio B /ORP Neutral	Blue
27	Bio B /ORP Active (240VAC)	Brown
43	Bio B /ORP Neutral	Blue
28	Bio A /ORP Active (240VAC)	Brown
44	Bio A Neutral	Blue
29	Inhibitor Active (240VAC)	Brown
45	Inhibitor Neutral	Blue
30	Bleed Solenoid Active (240VAC)	Brown
46	Bleed Solenoid Neutral	Blue
31	Mains Out Active (fused 240VAC)	
47	Mains Out Neutral	
32	Mains Supply Active (240VAC)	Brown
48	Mains Supply Neutral	Blue
49	Mains Supply Earth	Yellow/Green

## 4. Pre Service Setup & Checks

---

- ☐ Connect Power to the controller after installation. After a start-up sequence, the controller automatically goes into NORMAL MODE.
- ☐ Check/set Time and Date
- ☐ Saved settings can be applied by use of the USB port.
- ☐ Once wiring is completed and system started, outputs can be tested using the Test Inputs/Outputs function to verify correct operation.
- ☐ If the system has a modem, make a settings change to a setpoint and verify mobile connection with 'FTP Done' message.
- ☐ Connect probes, note do not install pH or ORP probes if system will be left with no water/stagnant as this will affect life and performance of these probes.
- ☐ The display will read the measured conductivity, ORP, and pH, as well as the Setpoints for these measured variables within square brackets.
- ☐ Perform commissioning calibration
  - pH 7 buffer then either 4 or 10 buffer
  - TDS slope
  - ORP factory calibration usually sufficient
- ☐ Use the Test Inputs/Outputs function to prime chemical pumps

## 5. Controller Display Functionality

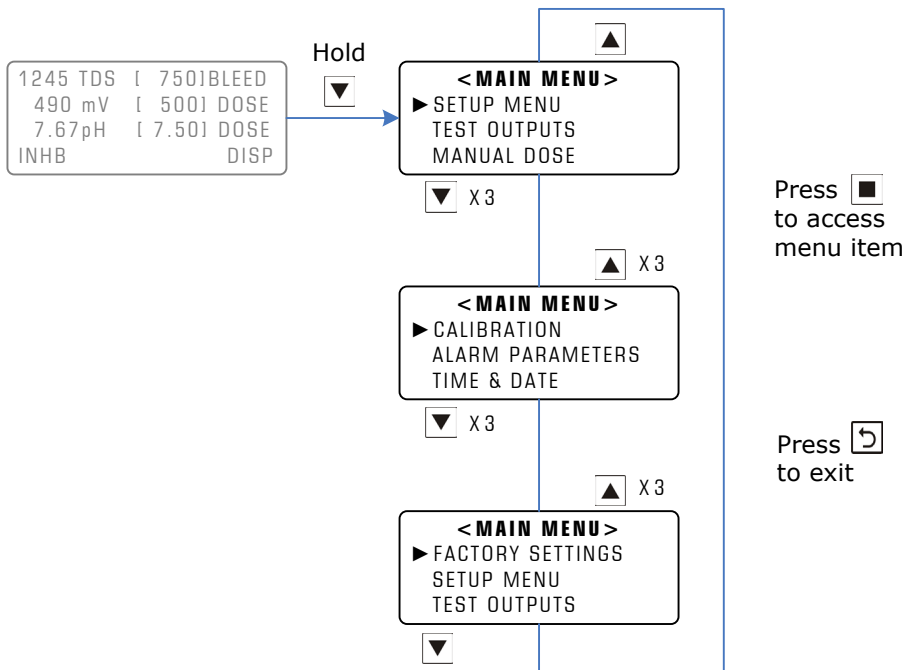

### Note:

If a pulse from a make-up water meter is received, a '+' will be momentarily displayed on the bottom line of the LCD screen.

If a pulse from a bleed water meter is received, a '-' will be momentarily displayed on the bottom line of the LCD screen.

The Main Menu as per the screen on the DIGICHEM Plus+ is shown below:

In the above diagram, TEST OUTPUTS can be selected to prime pumps / and test the various outputs of the system.

Please note that only basic relevant functions have been included in this quick start guide. For full details, please follow the QR Code link.

## 6. Default Factory Settings

### Default Factory Settings:

Menu Setting/Item	Default
<b>Start-Up Delay</b>	Count-Down: 0000s
<b>Conductivity Units</b>	TDS (i.e. ppm Total Dissolved Solids)
<b>Bleed Setpoint</b>	1000 ppm TDS
<b>Hysteresis</b>	3%
<b>Bleed Cycle</b>	ON/OFF = 00s/00s (ie. Disabled)
<b>pH Operation</b>	Dose Acid
<b>pH Control Setpoint</b>	7.50pH
<b>pH Dose Timer Alarm</b>	Max Dose: 120m
<b>ORP Operation</b>	Dose Oxidant
<b>ORP Control Setpoint</b>	500mV
<b>ORP Dose Timer Alarm</b>	Max Dose: 120m
<b>pH and ORP Control Methods</b>	Proportional
<b>pH and ORP Proportional Bands</b>	50%
<b>pH and ORP Control Cycles</b>	60s
<b>Ground Probe</b>	Enable? [Yes]
<b>High Alarms</b>	0000 for all (ie. Disabled)
<b>Low Alarms</b>	0000 for all (ie. Disabled)
<b>No Flow Alarm</b>	Enable? [No]
<b>Delay on Alarm</b>	Trip Delay: 3600s
<b>Bleed Timer Alarm</b>	Max Bleed: 000m (ie. Disabled)
<b>Timer Alarm Hysteresis</b>	3% (Feature only available for v0.91 or later)
<b>Inhibitor Mode</b>	On bleed
<b>Inhibitor Duty Cycle</b>	ON/OFF = 0050s/0050s (ie. On Bleed Only)
<b>Dispersant</b>	24hr/day, ON/OFF = 0000s/0000s (i.e. Disabled)
<b>Biocide Programs</b>	All programs disabled
<b>Pre-Bleed Setpoint</b>	Setpoint -15%
<b>Bleed Lockout Setpoint</b>	Setpoint +20%
<b>Condenser Pump Timer</b>	Biocide Dose + 000m
<b>Flow Switch</b>	Logic [Normal]
<b>Outputs disabled with no flow</b>	Bleed, Inhibitor, Dispersant, pH & ORP
<b>Data Logging</b>	LOG Every: 60 mins
<b>Disinfection ORP Setpoint</b>	500mV but disabled
<b>Extra Inhibitor Dose Start Time</b>	00:00
<b>Extra Inhibitor Dose Duration</b>	0000s i.e. disabled
<b>Water Volume Counters</b>	All Set to 0000p/m <sup>3</sup> i.e. disabled
<b>Cycles of Concentration</b>	Set to 0001
<b>Password Setup</b>	Enable?: [No ]
<b>Controller Name</b>	-----

### Specifications:

Item	Specification
<b>Power Supply</b>	220-240VAC, 50/60Hz
<b>Power Consumption</b>	10W max (with no loads on outputs)
<b>Inputs</b>	Conductivity Probe ORP Probe Solution Ground Probe (SS) pH Probe Flow Switch (Volt-free contact) Water meter Make-Up volt-free contact Water meter Bleed volt free contact
<b>Auxiliary Mains Output</b>	240VAC continuous (4A fused)
<b>Control Outputs – Switched 240VAC</b>	6A/240VAC resistive (4A fused)
<b>Alarm Relay Output</b>	N/O & N/C Volt-free (6A/250VAC resistive) (4A fused)
<b>Condenser Pump Relay Output</b>	N/O Volt-free (6A/250VAC resistive) (4A fused)
<b>Measured Conductivity Resolution</b>	1µS / 1 ppm TDS
<b>Conductivity Accuracy</b>	0.5% of measured range
<b>Conductivity Repeatability &amp; drift</b>	1.0% of measured range
<b>Measured ORP Resolution</b>	1 mV
<b>ORP Accuracy</b>	0.4% of measured range
<b>ORP Repeatability &amp; drift</b>	0.8% of measured range
<b>Measured pH Resolution</b>	0.01 pH
<b>pH Accuracy</b>	0.4% of measured range
<b>pH Repeatability &amp; drift</b>	0.8% of measured range
<b>Data retention</b>	100 years
<b>Battery backup</b>	1 year (approx)
<b>Battery type</b>	CR2032 (3Vdc)
<b>Enclosure rating</b>	IP65
<b>Operating</b>	0 - 50°C

## 7. Support

---

Should support be required of the system not perform as expected please contact us for support and refer to the following resources.

- Full Manual
- Installation diagrams
- Spare Parts
- Firmware upgrade guide
- Tips for remote setup and troubleshooting
- Instructional Videos
